NEW NETWORK TESTER

Single head test crystal head is different from the traditional tester, only one head line can be tested.

NF-468S

- Single head test
- Alignment test
- PoE test

No. 1 core of this head is not pressed well

Connected well

1-8 lights are all on

Poor connection

4 light off, indicating that the 4th wire core is not crimped properly

Determine PoE switch

Power supply type and power supply situation

Support 802.3af/802.3at two standards

Test result display

D1 Green Led	D2 Blue Led	D3 Green Led	D4 Blue Led	The results
√	×	×	×	12/36 cable power supply 802.3af standard
√	√	×	×	12/36 cable power supply 802.3at standard
×	√	×	×	45/78 cable power supply 802.3af standard
×	×	√	√	45/78 cable power supply 802.3at standard
√	×	√	×	802.3af. (4 sets of cables for power supply)
√	√	√	√	802.3at (4 sets of cables for power supply)

Note: When aligning, the test results of the tester must be matched with the remote lighting sequence to judge the correctness of the line.

Shielded network cable test

Can test unshielded/shielded network cable,

☆ open circuit

☆ cross

☆ straight through

☆ short circuit

Product parameter

Model	NF-468S
Maximum test distance	RJ45 network cable Cat5/5e/6/6a (UTP/STP) Universal cable,RJ11/12 telephone line Cat3 (6P2C/6P4C/6P6C)
Wire sequence/ fault indication	8 indicator lights, quick test
Blocking instructions	Yes
Crystal head test	Crimp test
PoE indication	4LED (middle/end jumper at/af PoE power supply environment)

PoE power supply test	Yes
Dimensions (LxWxD)	10.4x9.6x2.7cm
Power supply	DC 9.0V
Weight	200g
