

CSL 106T

IN-CEILING SPEAKER

Description

The CSL 106T speaker unit for ceiling-mounting consists of an ABS structure with a white RAL 9016 painted grille. It features a compact size and an excellent acoustic performance. This unit has handy tough spring-type hooks that make it easy to fasten securely to a false ceiling. A transformer for connection to a 100V constant voltage line is included in the supply, with selectable power-output steps.
