PASSIVE RADIATOR

Each SUBD8, SUBD10, AND SUBD12 contain a high-quality downward-facing composite radiator and a powerful front-firing driver. These features allow true-to-life sound by improving bass response and reducing unwanted frequencies.

MODERN DESIGN

Inspired by one of the greatest periods of American industrial design, Deep Subwoofers are a subtle yet elegant addition to any sound system. Enjoy deep tones and rich sonic environments without an unsightly black box dominating your space.

ON BOARD CONTROLS

The onboard controls allow you to dial in the subwoofer to your unique living situations easily. The phase, volume, and crossover are all comfortably accessed with large knobs on the rear.
